About Me

Full-Stack Developer with strong critical thinking and a keen interest in **Software Engineering**, **Embedded Systems**, and **Cybersecurity**. Proactive, communicative, and collaborative professional, always seeking continuous improvement and opportunities to contribute effectively to the team.

Technical Skills

- **Front-End:** Vue.js 2 and 3, Angular, Vuetify, Angular Material, Tailwind CSS, Bootstrap
 - **Back-End:** C# .NET, REST APIs, Node.js
 - **Databases:** PostgreSQL, MySQL, SQL Server
-

Professional Experience

Front-End Developer

Prolins IT Solutions — Fortaleza, Brazil

03/2025 – Present

- Development, maintenance, and optimization of SaaS systems using **Vue.js 2 and 3 with Vuetify**, focusing on performance, usability, and maintainability.
- Participation in the full development lifecycle: requirements gathering, user flow definition, UX/UI, API integration, authentication, testing, deployment, and ongoing maintenance.
- Bug fixing and implementation of new features.

Highlighted Projects:

- Veterinary management system (**SaaS**): Complete platform for veterinary hospitals and pet shops, built with clean architecture and scalability in mind.
- Service order management web application: Responsive system for managing executions in the public lighting sector, in partnership with municipalities.

Technologies: Vue.js 3, Vuetify, Supabase (PostgreSQL), Bootstrap.

- Healthcare web system: Platform for monitoring blood glucose levels across multiple municipalities, integrating public and private sectors to support social well-being.

Technologies: Angular, Angular Material, Tailwind CSS, ApexCharts, MySQL.

Education

- **B.Sc. in Computer Science** (in progress) — **Unifor**, Brazil (2025–2028)

Key topics: Object-Oriented Programming (**OOP**), **Java**

- Full-Stack Web Development (Live Program) — Digital College, Brazil (2025)

Key topics: Node.js, React
